Subject: RE: Five questions for Future Bayswater

Hi Linda,

In response to your 5 questions I say;

1. I have been a political party member for 24 years, I have been on a ticket for the upper state house, all though unlike one councillor I have never married a politician and unlike one other councillor do not work for politicians as two of the candidates have.
2. The Bayswater Subway/Train Station is of concern to me as it needs to be resolved, I do not have the solution as I have not been party to these discussions but obviously this is the entry point to the town centre (or exit).
3. Meltham Station is an area that is to my knowledge that is up for renewal and beyond that I know very little.
4. If elected my actions will be of support of all community hubs throughout Bayswaters four Wards so that they generate increased local employment and improve connectivity to our ratepayers.
5. My actions as a councillor are subject to the local government act and I would support the Mayor who speaks for the Council in engaging with State and Federal members to reach positive outcomes for our community and to liaison with the agencies responsible for these developments.
